

Check list for digital competition entries

Please start by preparing your entry as detailed in the forum post under Images or as per the pdf posted at the bottom of the competition page on the ADAPS website.

Once complete do the following checks.

A) Look at the folder name. Is this the way you want your name to appear on the screen and is it the same as used in the last competition. (Do not add your membership number)

B) Enter the folder and look at the image titles.

Have you numbered them 1, 2 and 3 followed by each image title

Example:

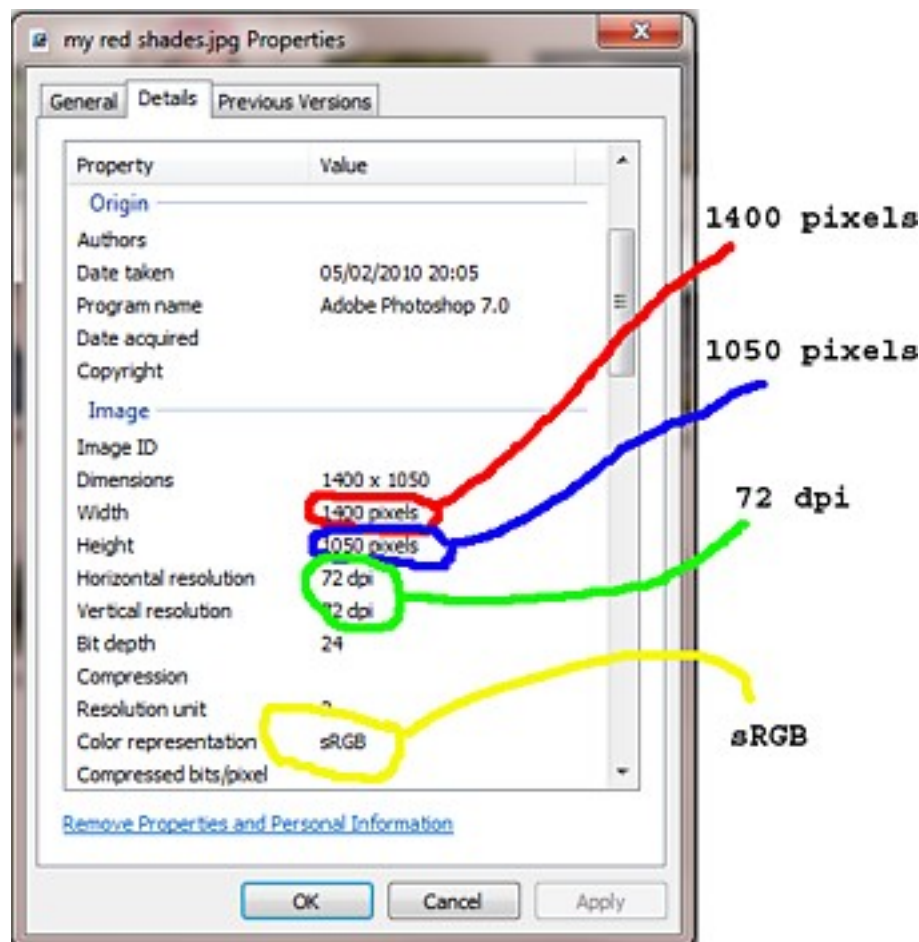

1 My best ever photograph

2 This one is not bad either

3 My mother

Note there should not be anything after the title (example: 3 My mother three) and watch the capitals because the title is shown on the screen.

C) Right click each image go to properties (at the bottom) and click the detail tab.

If any of these are different pull the image in to photoshop and correct.

If the Color representation is an other then sRGB or is "uncalibrated" use "Save As" and make sure that on the first pop-up screen at the bottom the ICC shows sRGB and the box is ticked.

Or in photoshop go to "Image/Mode/Convert to profile" and select sRGB as the destination Space. (DO NOT use "Assign profile")

D) Once these checks are complete and you are emailing it, right click the folder in Windows and click "Send to/compressed(zipped) folder". Make sure a zip folder with this name does NOT already exist in this location.
